

i3 Statprobe provides a full range of data management and biostatistical services for the pharmaceutical and biotechnology industries. We not only pay relentless attention to the details, we also lend a broader perspective to a client's data management needs. We realize that strategy is just as important as process, and we provide a higher level of thinking for data management and biostatistics. As a UnitedHealth Group company, i3 Statprobe is part of a worldwide health care service organization that uses innovation, integrity and commitment to prepare for the future - and you can prepare for yours with us. It's a rare combination for success that only a career with i3 Statprobe can provide.

### **Sr. Statistical Programmer**

We are looking for talented senior-level clinical statistical programmers to join our team at one of our following facilities: Ann Arbor, MI, Austin, TX, Cary, NC, Cincinnati, OH, Eden Prairie, MN, Lenexa, KS, Lexington, KY, San Diego, CA, or Waltham, MA.

**Sr. Statistical Programmers** lead the development and maintenance of analysis programs to support clients' drug development projects, lead the communication of technical issues with lead client staff and internal team staff, and contribute to internal technological advances.

#### **Primary Responsibilities:**

- Leads the implementation of data listing, summary, and graphs for inclusion in new drug applications (NDAs)
- Contributes to the development of and training on Standard Operating Procedures (SOPs)
- Develops software for standard operating systems
- Provides technical consult on clients' needs to i3 Statprobe Operations staff
- Troubleshoots as required for staff and clients regarding specific programming concerns
- Reviews listing, summary, graph, and tabulation specifications
- Provides secondary review of statistical programming deliverables
- Develops standard programming procedures
- Supports programming needs within i3 Statprobe Operations.

#### **Qualifications:**

##### Education:

- BA or BS in computer science, statistics, mathematics, or information technology.

##### Experience:

- At least four years programming experience with demonstrated leadership skills.
- Extensive knowledge of SAS required and knowledge of SQL, C, C++, Pascal, or other high-level 3<sup>rd</sup> or 4th generation languages is preferable.
- Exposure to pharmaceutical, biotechnology or device industry is required.
- Experience with project management, client communication, biostatistics and pharmacokinetics a plus.
