Build a better future

- Join team of staff and faculty working to improve outcomes for End-Stage Renal Disease patients.
- Work with team of skilled analysts, programmers, and project managers.
- Meet with project sponsors to define research questions and deliverables, present results, and determine next steps.
- Develop analytical and statistical approaches for specific research questions and evaluate and communicate results.
- Write SAS programs and documentation for data preparation, statistical analysis, and reporting.

Work with knowledgeable experts in a friendly learning organization. Founded in 1993, KECC is an interdisciplinary research center with \$11M in annual contracts. KECC offers rewarding careers with excellent benefits. Our work promotes health, improves clinical practice and patient outcomes, optimizes resource utilization, and informs public policy through high quality research and advances in biostatistics. KECC's core values are integrity, accountability, teamwork, excellence, and compassion.
