

PRINCIPAL STATISTICIAN/SENIOR PRINCIPAL STATISTICIAN

*These remote opportunities are open to any US home-office location.

Theorem Clinical Research is seeking Principal Statisticians and Sr. Principal Statisticians for full-time, salaried roles in the US. In this role, the selected candidate will analyze all parts of any clinical study, and provide planning on multiple clinical studies from multiple clients, along with the following:

- Manage Biometrics project teams and track department project activities (including project revenue) and provide status updates.
- Prepare statistical sections of protocols, including sample size calculations; develop randomization specifications and verify
- Represent department on interdepartmental project team and serve as contact with clients for statistical aspects of clinical studies. May serve as project leader for “back-end” projects involving multiple studies.
- Assist in establishing departmental processes, interaction with other departments, training of staff and other departmental administrative duties.

We require a Master's degree/Ph.D. in Statistics/Biostatistics or equivalent; 4-6 years for M.S. and 3-5 years for Ph.D. in clinical data experience. High degree of accuracy and attention to detail along with proficiency in SAS and ability to program using SAS macro language required. Proficiency in statistical procedures including non-parametric analysis, linear and non-linear models, categorical data and survival analysis techniques is also required along with excellent project management and organizational skills.

No special physical demands and major part of work done in office environment. Some travel required for project team meetings.

When you're ready to join a company that's as dedicated to excellence as you are, THINK THEOREM.
