

Overview:

Altarum Institute is looking for an experienced programmer to assume responsibilities for acquisition, entry and management of data and metadata for a range of survey projects. The survey data manager handles all aspects of data management coordinating with internal staff and external vendor teams. The position may be located in either our Alexandria, VA office, or our Ann Arbor, MI office. The SAS Programmer/Analyst will support a range of complex health survey-related projects and other developing work throughout the Institute.

Interested applicants are encouraged to apply directly at:

<https://jobs-altarum.icims.com/jobs/2073/job>

Responsibilities:

Primary responsibilities include:

- Preparing, verifying and managing survey data and metadata
- Developing and modifying SAS programs
- Conducting data quality check
- Improving current systems of cataloging, organizing and managing all data collected and produced for the project(s)
- Working independently with little supervision and ability to work and communicate effectively in a team environment
- Demonstrating proficiency in SAS 9.2
- Demonstrating familiarity with UNIX or SQL Server environments. Advanced SQL experience is a big plus.

Qualifications and Experience:

- Bachelor's Degree
- Strong experience with SAS programming
- Familiarity with UNIX and/or SQL Server
- Experience with relational databases
- Very detail oriented
- Experience with Survey data strongly preferred
- Familiarity with Military Health System data strongly preferred
- Must be able to receive a U.S. Security Clearance (sole U.S. citizenship required)
