

# A SAS Macro to Create an Automated Data Dictionary

Jonathan P. Troost, PhD

03/25/2021

- The Michigan Institute for Clinical & Health Research (MICHR) is here to enable & enhance clinical & translational research at the University of Michigan
- We do this by being a catalytic partner that educates, funds, connects & supports research teams here and beyond

- Topic:
  - This presentation will introduce a macro I have created and been using to automate the creation of a data dictionary based on the meta data of a SAS dataset (namely the labels and formats for each variable)
- Bio:
  - I am a lead statistician at the University of Michigan (Michigan Institute for Clinical & Health Research).
  - I work mostly in SAS and have a lot of experience as a data coordinating center statistician
